

//output:ScriptStatus.html p Idea: WHY have the arc install item in each section with seperate functions? ... I should make ONE function that takes care of things no matter the distro and in each Distro Section .... link to that single function

p All Tasks means most of the above tasks just done all at once and not forcing the user to click one by one by one. IMPORTANT ... put a prompt to the user at the start with "are you SURE you want to do this?"

## H1 Status of Scripts

H2 Arch Scripts H3 Update System H3 Optimize Mirrors H3 Add Yaourt p considering adding packer and/or packAUR too H3 Add Sound Support H3 Add Archive Support H3 Add Arc Theme and Icon Pack

div **TODO**: Add "install list of common software "

div **TODO**: Add All Tasks option  
H3 Return to Main menu  
H3 Quit to Prompt

## H2 Fedora Scripts H3 Update Fedora H3 Add RPMFusion and/or UnitedRPM (Submenu)

H3 Add Fedy  
H3 Perform common Fedy Tasks (without having to install Fedy... per-say)  
H3 Add common Software  
H3 Install The Arc Theme  
H3 All Tasks  
  
H3 Return to Main menu  
H3 Quit to Prompt
